Dr. Ivy T. Jumawan, BAC Member explained the process in the Sealing of Envelopes using the Two-Envelope System, to wit:

Envelope Sealing Illustration

(Two-Envelope System)

Dr. Ivy T. Jumawan also added some important reminders in sealing the bid envelopes, to wit:

- Table of Contents with proper tabbing of documents in chronological order.
- Photocopied Bid Documents must be duly signed and marked "Certified True Copy

from the Original” by the Bidder/Owner. It was reiterated that there must be signature over printed name of the bidder/owner.

- If Bid envelopes are not sealed the BAC will not be responsible of any unfavorable preemptions.
- Refer to the Revised RA 9184 for the sealing and marking of bidding documents.

Mrs. Myles Sayre/BAC Secretariat reiterated the COA guidelines that a project signage or billboard must be placed in the vicinity of the project.

Dr. Bridget E. Abalorio motioned for an issuance of a supplemental bid for the inclusion of the guidelines of PROJECT SIGNAGE/BILLBOARD in the vicinity and was seconded by Dr. Ivy T. Jumawan, BAC Member.

After the discussion of Mrs. Ivy T. Jumawan on the sealing of bid envelope, Engr. Amenodin Hadji-Amer, Technical Working Group member discussed the Technical Specifications for the project, to wit:

- Prescribed format for the Program of Works for Bill of Quantities and Detailed Cost Estimates for the Upgrading of Electrical System;
- The Detailed Unit Price Analysis (DUPA) was also discussed comprehensively including the designation of personnel, labor and equipment standards;
- Manpower Schedule as described in the DUPA

Engr. Hadji-Amer also mentioned that the Approved Budget of Contract should be stated in the Program of Works. He discussed the format of the Program of Works/Bill of Quantities and specify that all the items and quantities therein should remain intact or complete as stated and should not be altered.

Dr. Marife B. Vicoy, BAC Vice Chairperson and Dr. Lorraine O. Edrea, BAC Member asked about the value of the quantity, output and unit of the DUPA as specified in the project.

Engr. Amenodin Hadji-Amer mentioned that the quantity, output and unit are fixed and constant and must be followed.

Engr. Vicente Fernandez, RO TWG added that the contractor can ask the technical working group about the variation before the opening of bids for an issuance of a bid bulletin.

Dr. Abalorio asked about the quarterly payment whether it was based on a yearly basis or based on the contract duration.

Engr. Amenodin Hadji-Amer said that the quarterly payment is based on the contract duration for this project which is 120 calendar days.

Dr. Edrea stated that the LIST OF PERSONNEL as indicated in the INVITATION TO BID must be followed.

Engr. Jevie Jala, RO TWG presented the site development plan of Diosdadyo Yap Sr. National High School which includes all electrical system like wired and solar lines, and also the ground wirings. He also discussed about the schedule of loads, distribution of board and single-line diagram, electrical analysis and the KA Interrupting Capacity which includes the computed voltage drop of the project.

He also presented the difference of the electrical system of an elevated surface and plain surface including the concrete encasement details.

After that, he also presented the Magsaysay National High School Electrical Layout.

Dr. Edrea mentioned about the tendency of a bidder bidding on Lot 1 only which involves the hole digger equipment, she asked whether or not the bidder still have to have a hole digger since there are only overhead wirings as stated in the project.

Engr. Jala answered that the bidder should have a hole digger because they have to dig for the primary post and other wirings and pipings as specified in the project.

Dr. Abalorio asked about the necessity of certification from LANECO for the implementation of project whether the bidder must present a certification or not.

Dr. Ablin mentioned that the bidder must comply certification from LANECO based on the previous projects experiencing delays due to some requirements needed by LANECO on some electrification guidelines set by the cooperative.

Dr. Edrea asked Engr. Hadji-Amer about the processes of previous projects in the tapping of electrical systems.

Dr. Ablin stated that the tapping of electrical wirings outside the vicinity of schools is not the responsibility of the bidder anymore. She said that tapping of electrical wirings outside the vicinity of the school is the responsibility of the school itself and not of the bidder.

Mr. Armando B. Pasok, BAC Member also stated about the installment of a transformer must be coordinated with LANECO and must be negotiated with LANECO.

Engr. Jala said that the energization process outside the school vicinity is not the responsibility of the bidder anymore. But the testing of the transformer for energization is the responsibility of the bidder. The bidder is advised to bring the transformer to LANECO for testing of its energy capacity.

Dr. Ablin said that the school must look for options in tapping electricity outside the school vicinity as per previous project like Maigo National High School.

Engr. Jala said that if the school has an Occupancy Permit, the school won't have a problem in the tapping of electricity to the main lines of LANECO.

Dr. Ablin stated that these school buildings are newly-constructed buildings with electrification permits so there won't be a problem in the tapping of electricity to the main lines.

Dr. Ablin asked the BAC Members whether or not to allow bidders who have unliquidated damages and the BAC unanimously decided not to allow bidders with unliquidated damages for more than one month, therefore, making it as ground of disqualification in the bidding process for this project.

Dr. Abalorio asked the engineers for list of bidders or contractors with issues in complying requirements of past and ongoing projects and the engineers agreed to give the list.

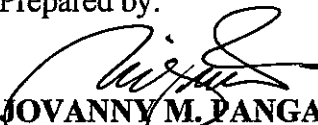

Dr. Abalorio moved for a supplemental bid for the disqualification of bidders with issues in previous and ongoing projects and was seconded by Dr. Jumawan.

Mam Myles Sayre reiterated about the strict implementation of the procurement schedule of the project as required by the Commission on Audit on the completion of projects.

Afterwards, the Presiding Officer asked the BAC members for any additional instruction and clarification from the bidders.

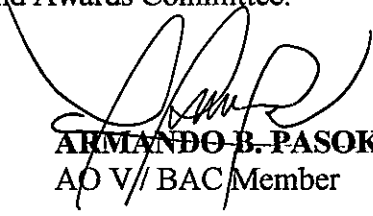

There being none, the Presiding Officer adjourned the Prebid Conference at around 11:24 A.M.
